

After careful consideration of the current circumstances surrounding the COVID-19 virus, the Society for Biotechnology, Japan (“SBJ”) Board of Directors and the Meeting Organizing Committee decided not to conduct the 72nd SBJ Meeting, originally scheduled for September 2-4, 2020 in Sendai, Miyagi.

Although on-site activities and presentations will be cancelled, we are considering to hold award lectures and symposium online. Please continue to check our website for details and updates.
