

Editorial Manager already enabled authors to link their EM account with their ORCID ID. It is now also possible for reviewers to have information about their review activities automatically uploaded to their peer review section of their ORCID record. Having this review information displayed publicly acknowledges their contribution to the journal and helps to raise their review profile. (Note that we only share the journal name and year of review completion.)

- Recognition innovation: enabling peer review activity integration with ORCID (Elsevier)
