

- **Improvement of isopropanol production by metabolically engineered *Escherichia coli* using gas stripping:** JBB vol.110, no. 6, p. 696-701, 2010
…Kentaro Inokuma, James C. Liao, Masahiro Okamoto and Taizo Hanai* (Kyushu Univ., Univ. of California)
- **Bioethanol production from ball milled bagasse using an on-site produced fungal enzyme cocktail and xylose-fermenting *Pichia stipitis*:** JBB vol.110, no. 1, p. 18-25, 2010
… Benchaporn Buaban, Hiroyuki Inoue, Shinichi Yano, Sutipa Tanapongpipat, Vasimon Ruanglek, Verawat Champreda, Rath Pichyangkura, Sirirat Rengpipat and Lily Eurwilaichitr* (Chulalongkorn Univ.; BIOTEC, Thailand; AIST, Japan)
- **Differential importance of trehalose accumulation in *Saccharomyces cerevisiae* in response to various environmental stresses:** JBB vol.109, no. 3, p. 262-266, 2010
…Siraje Arif Mahmud, Takashi Hirasawa and Hiroshi Shimizu* (Osaka Univ.)
- **High-throughput screening of DNA binding sites for transcription factor AmyR from *Aspergillus nidulans* using DNA beads display system:** JBB vol.109, no. 6, p. 519-525, 2010
…Takaaki Kojima, Yoko Hashimoto, Masashi Kato, Tetsuo Kobayashi and Hideo Nakano* (Nagoya Univ.)
- **New monitoring approach for metabolic dynamics in microbial ecosystems using stable-isotope-labeling technologies:** JBB vol.110, no. 1, p. 87-93, 2010
…Yasuhiro Date, Yumiko Nakanishi, Shinji Fukuda, Tamotsu Kato, Satoshi Tsuneda, Hiroshi Ohno and Jun Kikuchi* (Waseda Univ., RIKEN Plant Science Center, RIKEN Research Center for Allergy and Immunology, Yokohama City Univ., Nagoya Univ.)
- **Onset timing of transient gene expression depends on cell division:** JBB vol.109, no. 1, p. 62-66, 2010
…Kazumi Hakamada, Satoshi Fujita, and Jun Miyake* (Univ. of Tokyo, Research Institute for Cell Engineering, AIST)
